Expansion of Comprehensive Utility Services such as Steam to Toray's U.S. Plant

Tokyo Gas Engineering Solutions Co., Ltd.

TGES America Ltd.

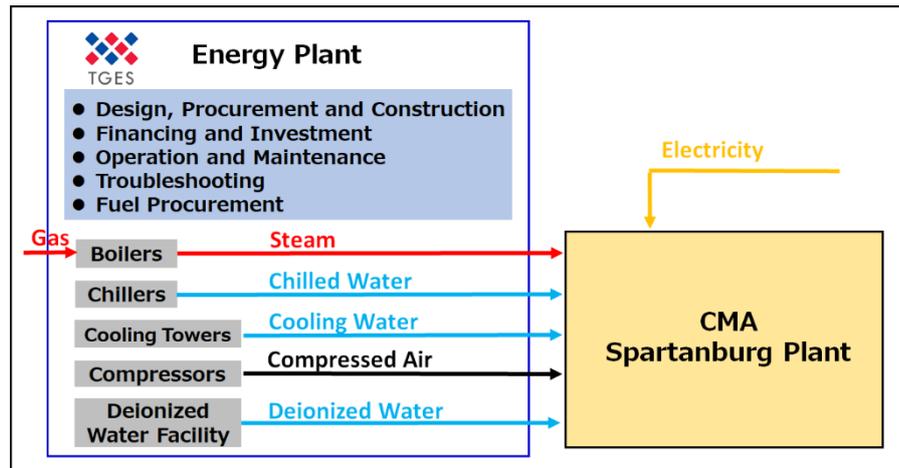

TGES America Ltd. (President: Konosuke Usui, hereinafter "TGES America"), the U.S. subsidiary of Tokyo Gas Engineering Solutions Co., Ltd. (President: Yasuhiro Konishi, hereinafter "TGES"), has reached an agreement with Toray Composite Materials America, Inc. (President: Dennis Frett, hereinafter "CMA"), the U.S. subsidiary of Toray Industries, Inc. (President: Mitsuo Ohya), to expand utility services to CMA's Spartanburg plant.

TGES America installed its utility equipment at the energy plant next to the Spartanburg Plant in October 2016 and has since supplied steam, chilled water, cooling water, deionized water, and compressed air. TGES America provides a comprehensive utility service business that handles everything from an energy plant's design and construction to equipment operation and maintenance^{*1}.

This service expansion is in response to CMA's production expansion plan^{*2} at its Spartanburg plant, with TGES America planning to install additional utility equipment and supply it starting in 2025.

TGES America's Energy Plant

Energy Service Scheme

TGES provides integrated solutions from an energy plant's design and construction to operation and maintenance management based on the knowledge and skills accumulated throughout Japan. TGES will continue to use TGES America as its base in the United States to address customer concerns such as decarbonization.
